- Nepali
- English
- Hindi

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Developer and Python enthusiast pursuing BSc. CSIT at Tribhuvan University. Skilled in building scalable web applications, RESTful APIs, and AI-powered solutions using React.js, Django, and Django REST Framework. Experienced through internship and project-based work including medical systems, eCommerce platforms, and computer vision applications.

PROFESSIONAL EXPERIENCE

Python & Full Stack Developer Intern

3 Months

Nirwana Infratech Engineering Pvt. Ltd.

- Worked on real-world software development projects, including medical-related systems.
- Developed backend APIs and integrated frontend systems using Django and Django REST Framework.
- Collaborated with developers to improve application performance and usability.
- Participated in debugging, testing, deployment, and maintenance of applications.

PROJECTS

GreatStore – Full Stack eCommerce Platform

- Full stack eCommerce using React.js (frontend) and Django REST Framework (backend).
- Implemented product management, authentication, cart functionality, and API integration.
- Designed responsive UI and optimized backend performance.

Dental Clinic Management System

- Built and customized dental-related web systems with secure Django backend.
- Worked with APIs, database management, and responsive web design.

Human Movement Detection System

- Computer vision-based application for detecting and tracking human movement using Python AI techniques.

Theft Detection System

- Intelligent surveillance system for suspicious activity detection using real-time computer vision.

NEPSE Data Analysis

- Stock market data analysis using Python, Pandas, and NumPy with visualization and trend insights.

CAREER OBJECTIVE

To secure a challenging software development position applying full stack, Python, and AI skills to build impa
